PROFILE

Software Engineer with experience delivering enterprise platforms, full-stack web applications, automation pipelines, and AI/IoT systems. Built business-critical software for up to **600 employees** and client products serving nearly **250 active customers**, with ownership spanning requirements, development, deployment, code review, and infrastructure operations.

CORE SKILLS

Full-Stack	Laravel, React.js, Next.js, Go, Python, Express.js, Flask, REST API, SQL, MongoDB, HTML/CSS
Enterprise & DevOps	SSO, RBAC, audit logging, Git, Docker, Nginx, Apache, on-premise server, VPN, Vercel, Azure
AI, IoT & Data	PyTorch, TensorRT, YOLO, RT-DETR, Airflow, Jetson Nano, ESP32, Arduino, PyQt, Three.js

PROFESSIONAL EXPERIENCE

PT. Aldzama

Software Engineer

Oct 2025 – Present

Gresik, Indonesia

Selected software developed

- **AZM Employee Portal** | SSO, RBAC, audit logging
Developed a centralized employee gateway that provides one-time login and role-based access to internal applications. Integrated RISE employee profiles, announcements, language/theme settings, and login/application activity logs to strengthen usability, governance, and auditability.
- **HRIS & Attendance ERP** | Laravel, SQL, on-premise deployment
Built and maintained an internal HR platform for **approximately 600 employees**, covering attendance, timesheets, leave requests, and payroll export for direct bank transfers. Replaced recurring per-user licensing with a customizable in-house system.
- **Corporate Website & Subsidiary Platform** | React.js, Laravel API, CMS
Designed and delivered two CMS-integrated company websites, launching the primary corporate site and developing a separate subsidiary platform.
- **Refractory Maintenance Dashboard** | Project management, system delivery
Led project scope, stakeholder alignment, technical execution, and delivery planning for a maintenance monitoring dashboard.

Engineering operations

- Managed GitHub workflows and deployments across **13 active projects**, including pull-request review, code integration, and release readiness.
- Administered on-premise servers, VPN access, Synology secondary backup, and an internal mail server to improve system availability, security, and capacity.

Freelance

Full-Stack, AI & IoT Developer

2022 – 2025

Hybrid

Selected client software

- **JAREE ITS Academic Journal Platform** | OJS, PHP, MySQL | Jul – Oct 2025
Migrated OJS v2 to v3 while preserving service for **30,000+ users** and **597,000+ records**; configured the peer-review workflow and created a custom front-end theme.
- **Retrux-Shelf-Eye** | Python, PyQt, RT-DETR, SAHI | Aug – Sep 2025
Built a real-time inventory monitoring application with multi-camera support, sliced object detection, and dynamic directory management.
- **Padel-Clipper** | Flask, Express.js, ESP32, VPS | Aug 2025
Developed the monitoring dashboard and backend integration, programmed the IoT trigger device, and deployed the service for nearly **250 active customers**.
- **3D Container Loading Optimizer** | React.js, FastAPI, Go, Three.js | Jul – Aug 2025
Implemented Genetic Algorithm, BLF, and CLPTAC packing methods with interactive 3D visualization, achieving an **87–89% container fill rate**.

PROFESSIONAL EXPERIENCE (continued)

PT. Telkom Indonesia Regional V
Programmer Intern, ROC Department
Software and automation developed

- Automated Data Pipeline** | Python, Apache Airflow
Engineered a web-scraping pipeline that reduced data retrieval latency by more than **80%**.
- OCR & Operations Tool Suite** | OCR, validation workflow, Power Automate
Delivered two OCR workflows and seven integrated tools that reduced manual data processing by **40%**; built VPN auto-reconnect automation to prevent connectivity disruptions.

Feb 2024 – Apr 2024
Surabaya, Indonesia

SDN Klampis Ngasem I
Robotics Extracurricular Tutor

- Developed **10+ Arduino obstacle-avoidance robots** and mentored students for BARONAS ITS, helping the team reach the semi-finals.

Aug 2022 – Jul 2023
Surabaya, Indonesia

SELECTED PROJECTS

Smart Finance App | Go, React.js, Python, PostgreSQL
Built a personal finance platform with a Go API, React interface, PostgreSQL database, and Python ML service for automatic transaction categorization. [Repository](#)

Sep 2025

Vehicle Speed Estimation System | Python, YOLOv8, TensorRT, Jetson Nano
Developed a real-time drone-based system with **99.55% peak accuracy**; optimized inference from more than **90 ms** to less than **35 ms** on Jetson Nano. [Repository](#)

Feb – May 2025

BengkelMate | MongoDB, Express.js, React.js, Node.js
Developed a role-based workshop workflow for Security, Service Advisor, and Spare Parts teams; achieved Lighthouse scores of **96 Performance**, **96 Best Practices**, and **92 SEO**. [Repository](#)

Oct 2024 – Jan 2025

EDUCATION

Institut Teknologi Sepuluh Nopember
B.Eng. in Computer Engineering | GPA: 3.43/4.00

Aug 2025
Surabaya, Indonesia

LEADERSHIP EXPERIENCE

Head of Human Resources | BK MWA-WM ITS
Managed recruitment, training, culture, and well-being for **40+ staff**; processed **50+ applicants**.

Jul 2023 – Jul 2024

Project Officer | TEKMEET 2023
Organized a tournament for **300+ students** and a charity event serving **50+ people**.

Jan – Mar 2023

CERTIFICATIONS

Internship Certificate | PT. Telkom Indonesia Regional V
Intermediate Machine Learning | Kaggle
Feature Engineering | Kaggle

Apr 2024
Dec 2023
Dec 2023
